***Allowable Subject Matter***

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to an inter-vehicle traffic communication system. The independent claim identifies the uniquely distinct features "a method of receiving traffic messages transmitted from vehicle to vehicle characterized in that information from received messages is only accepted when a number of identical items of information are received". The cited prior art fail to anticipate or render the above limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Hudson, Jr. (US 7,188,025), Watanable (US 7,254,480), Nishiga et al. (US 7,272,357), and Coates (US 2007/0088464) are cited to show a variety of inter-vehicle communication systems.
